PROFILE

Web designer and front-end developer with 5 years designing and shipping websites, e-commerce platforms and digital campaigns for UAE brands, including P&O Marinas, DP World and Abu Dhabi Investment Office. I work from Figma to production in React/TypeScript, headless WordPress and Laravel/Vue, and lead most client projects day to day: scoping with clients, coordinating backend work and owning delivery.

EXPERIENCE

Web Designer

Oct 2021 – Present

Creativo FZCO · Dubai, UAE

Role spans UI design, front-end development and project leadership across the agency's client accounts.

- **Project lead:** run delivery on most client projects in a small team — gather requirements with clients, coordinate the backend developer, assign tasks and run check-ins through launch.
- **10+ websites shipped** from Figma to production, including e-commerce platforms, for clients in maritime, logistics, government, real estate, retail and healthcare.
- **Headless WordPress:** build sites with WordPress as the CMS behind React/TypeScript front ends, so clients edit content easily while the front end stays fast and on-brand.
- **Custom features:** interactive berth-management map for P&O Marinas, filterable cruise schedule for DP World Cruise Terminal, e-commerce admin panel for Moni Li Jewellers and a course scheduling backend for P&O Marinas Sailing Academy.
- **Performance & SEO:** improved page-speed scores and organic visibility through technical SEO, Core Web Vitals and WCAG accessibility fixes; set up Google Analytics reporting for clients.
- **Campaigns:** landing pages, coded HTML newsletters in AWeber with open-rate reporting, and social graphics and reels for 5+ brands.

Web Developer (Part-Time)

Sep – Oct 2024

Ami Digital Marketing FZ-LLC · UAE

- Built and updated WordPress/Elementor sites to the company's brand guidelines.
- Wrote custom CSS for consistent, responsive layouts across mobile and desktop.
- Debugged performance issues and shipped content updates on tight timelines.
